

Features & Benefits

Your meter pit is no good if it sinks, corrodes or deteriorates. That's why you need durable, lightweight meter pits from DFW. Each pit is made of structurally superior materials that won't rust or crumble. Our pits have a molded bottom lip that resists settling and is available in black or white. So for meter pits that help keep meters running, count on DFW. Providing superior products is our job.

Universal locator that has been designed to accommodate pit covers of different dimensions

Features	Benefits
1. Universal Locator	Heavy Duty Meter Pits have a patented universal locator molded into the top of the pit, allowing one pit to fit several cast iron rings and covers. (Patent No. 5249697)
2. Wall Design	Heavy Duty Meter Pits are designed with a unique base footing and crush-resistant ribbing. The meter pit, when installed to grade, will not settle, thus eliminating costly grade adjustments.
3. Design & Material	Heavy Duty Meters Pits, with their patented design features and high-tech materials, have solved the problems of tedious installations, costly maintenance, and multiple inventories for different rings and lids.
