

## Features & Benefits

Features	Benefits
1. Patented Polymer Design	Retrofit Lids are designed to replace concrete, cast iron, metal, and composite lids in existing underground enclosures.
2. AMR/AMI Technology Enhancement Options	Retrofit Lids are designed to accommodate various transponder and endpoint installations by providing protection from vandalism, weather, dirt, and mud, to assist with clear signal reception.
3. Field Adaptability Options	Retrofit Lids are designed to allow for field adjustments as required, including “knock-out” option for AMR/AMI endpoint installations on the job site.
4. Locking Mechanisms for Lid	Retrofit Lids are designed to provide several different locking options, including bolt down, worm gear, and key lock.
5. Load Rating	Retrofit Lids are designed to provide ASHTO H10 and H20 load ratings.
8. Colors	Retrofit Lids are available in black, blue, purple, green, or sand colors.
