

Light Duty | Plastic Meter & Valve Boxes

Features & Benefits

Features	Benefits
1. All Plastic Construction	Light Duty Boxes are constructed using engineered plastics designed for specific use as valve boxes. Plastic is blended to accommodate extreme weather conditions and to withstand constant ground movement.
2. Wall Design	Light Duty Boxes are designed with extra ribbing to increase the strength of the box to withstand sidewall compression.
3. Bottom Flange of Box	Light Duty Boxes have bottom flanges to help prevent sinking and provide extra strength to protect the water meters that are installed in the box.
4. Tapered Walls of Box	Light Duty Boxes have tapered walls to help distribute the wall compression from the bedding of the box and to give added strength in vertical compression.
5. Lid	Light Duty Lids are "T" lid style. On the 12" Standard & 12" Jumbo the lid sits down in the box to create a drop-in look but provides 2 levels of support.
6. Load Rating	Light Duty Boxes & Lids are rated for non-deliberate incidental traffic.
7. Locking Mechanisms for Lid	Light Duty Boxes & Lids are available with snap down, bolt down, or key lock mechanisms.
8. Colors	Light Duty Series is available in black, blue, purple, green, or sand colors.
